Career Objective

Motivated and detail-oriented Electronics and Communication Engineering (ECE) student at Alliance University with strong interest in Embedded Systems, Artificial Intelligence, and sustainable engineering solutions. Skilled in C programming, Python programming, Arduino development, and problem-solving using mathematical concepts. Actively participates in hackathons, technical programs, and online certifications to continuously improve technical knowledge. Seeking opportunities to apply engineering skills to real-world projects and innovative research.

Education

B.Tech - Electronics and Communication Engineering (ECE), *Alliance University*

Currently in 2nd Year

- Strong academic performance with good CGPA
- Strong foundation in:
 - Engineering Mathematics
 - Electronic Circuits
 - Signals and Systems
 - Programming Fundamentals
 - Logical Thinking

Soft Skills

- | | |
|-------------------------------|------------------------|
| • Strong mathematical ability | • Logical thinking |
| • Problem solving skills | • Active learner |
| • Team collaboration | • Adaptability |
| • Creativity | • Communication skills |
| • Analytical thinking | |

Languages

- | | | |
|-----------|-----------|---------|
| • Kannada | • Hindi | • Tamil |
| • Telugu | • English | |

Research & Interest Areas

- | | | |
|--------------------------------------|----------------------------------|--------------------------------|
| • Embedded Systems | • Artificial Intelligence basics | • Arduino project development |
| • Nature-based engineering solutions | • Electronics circuit design | • Mathematical problem solving |
| • Programming logic development | • Signal processing basics | • Sustainable technology |
| • Data visualization basics | | |

Projects

Solar Water Dewatering System, Ongoing Project

- Developing eco-friendly water management solution using solar energy
- Focus on sustainable engineering and nature-based solutions
- Learning circuit design and system implementation

RiderMate App, OpenAI Buildathon (NextWave Academy)

- Contributed as team member in innovative application idea
- Focus on real-world problem solving and system design

Smart Blind Stick Project

- Worked on assistive technology solution for visually impaired people
- Applied embedded systems and sensor concepts

Mobile Detection System using Arduino

- Designed system to detect mobile signals in classroom environment
- Applied signal concepts and Arduino programming

Nature-Based Solutions Projects

- Worked on sustainability related ideas with academic mentors
- Focus on eco-friendly engineering concepts

Certifications

5-Day AI Agents Intensive Course - Kaggle & Google

Embedded System Design using C Programming

Python Programming Certification - NIELIT (Government of India Institute)

Embedded Systems Certification - NIELIT

Coursera Certifications (Programming, Computer Applications, Problem Solving)

Hack2Skills Programs Participation

OpenAI Buildathon - NextWave Academy

Suvidha Hackathon - Government Initiative Participation

Online Certifications in:

- C Programming
- Python Programming
- Computer Applications
- Programming Logic
- Signals & Circuits basics

Technical Activities

- Participated in hackathons and technical competitions
- Active learner in programming platforms
- Continuous skill improvement through online certifications
- Interest in innovative technical solutions
- Exposure to real-world engineering problem statements
- Participation in Hack2Skills technical programs
- Participation in Government initiative hackathons
